Intensiv CrownCutter

Carbide instruments for crown cutting

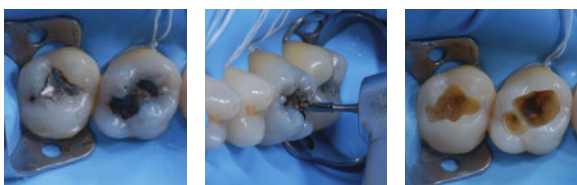

Conical and cylindrical instruments with rounded and plain working surfaces with unique cutting edges for precise, vibration-free division.

Intensiv CrownCutter fulfil high demands perfectly, thanks to their uniquely designed cutting edges (pitch diameter precision) and exceptional manufacture (one-piece instrument).

Indications

- Separation and removal of crowns and bridgework in ceramic and metal as well as bonded metal/ceramic
- Removal of amalgam and gold fillings

Clinical pictures:
Dr. S. Giani
University of Insubria, Varese
(Italy)

Advantages

- Superior cutting performance
- Accelerated separation process
- Minimum patient stress during treatment
- Chopped and not pulverized debris
