

# Intensiv Proxoshape

University of Zurich and Bern, Switzerland

Oscillating diamond-coated files  
for the removal of overhangs  
and finishing of proximal filling surfaces.

## Indications

- Removal of: Filling and cement overhangs
- Finishing and trimming of: proximal crown margins in gold or ceramic
- Contouring and finishing of: proximal restoration surfaces

## Benefits

- Easier access to the interproximal space
- No iatrogenic damage to adjacent teeth
- Prevention of surface wave generation caused by rotating instruments
